

## PRESS RELEASE

For media inquiries, please contact, Angela Chambliss or Tarenia Carthan at [info@angelsntech.com](mailto:info@angelsntech.com)

### *Robotics with AngelsNTech and Robochick Madison Kenney*

Atlanta, Georgia– June 12, 2019– The Angels and Me Foundation, AngelsNTech, a non-profit mentoring organization established to *Ignite* interest, *Innovate* solutions, and *Inspire* young girls and support parents within STEAM fields will be hosting a Robotics workshop, Saturday, June 22, 2019, 2:00pm at the Southwest Arts Center in South Fulton.

Program participants will have the opportunity to hear from a fellow peer that's leading innovation in robotics, #Robochick, Madison Kenney. Each participant will also participate in a lab exercise learning how to build and configure a robot.

This event is being sponsored by the Motorola Solutions Foundation. To register for the event, visit [www.angelsntech.com/events](http://www.angelsntech.com/events).

For more information on The Angels and Me Foundation, AngelsNTech please visit [www.angelsntech.com](http://www.angelsntech.com)

**About The Angels and Me Foundation, AngelsNTech**  
Angels & Me Foundation Angels N Technology (AngelsNTech), is a mentoring organization established to groom young girls and provide parents with resources to support their daughters' aspirations in all fields of Science, Technology, Engineering, Arts, and Mathematics (STEAM). As these fields continue to have a lack of inclusivity, our goal is to engage minority girls from underrepresented communities, ages 11-18 to explore the fields of STEAM as career choices. Through teaching, hands on projects, career shadowing, mentoring, and fostering positive attitudes toward STEAM, we empower girls to reach their fullest potential and realize they can be anything they choose. Our motto is to Ignite a passion for STEAM, Innovate techniques of tomorrow while problem solving today's challenges, and Inspire the next generation for change. AngelsNTech remains engaged throughout the lifecycle of our programs with each girl and caregiver/parent to ensure that the natural skills, and curiosities regarding STEAM careers including using skills gained for entrepreneurship endeavors, are upheld until the participants reach 18. At that point the objective of guiding the participants into a career field within STEAM, whether through college, technical trade, certification or job readiness, will have been met.

#### **Madison Kenney** Guest Speaker

Award winning Robotics maven and rising Junior at Georgia Connections Academy and Dual Enrolled student at Kennesaw State University with a passion for STEM that aspires to become a Mechatronics Engineer. At the age of nine Madison founded the RoboChicks Robotics Team that has competed in FIRST Lego League, FIRST Tech Challenge and Seaperch Underwater Robotics. She has led her team to winning many awards locally and Nationally.

**What to expect?** Program participants will have the opportunity to hear from a fellow peer that's leading innovation in robotics. Participants will also have the opportunity to participate in a lab learning how to create a robot. Refreshments will be provided.

**Saturday, June 22, 2019**
