AngelsNTech presents a Fireside Chat with WSB-TV Meteorologist Eboni Deon

Atlanta, GA – Angels N Tech will present its next STEAM Forum Series taking place online Saturday, October 24, 2020 at 2:00pm featuring WSB Meteorologist Eboni Deon.

Angels N Tech is proud to bring to our next generation of budding minds in Science, Technology, Engineering, Art, & Math (STEAM) - Ms. Eboni Deon. Ms. Deon is a Meteorologist and a woman of color who is blazing a trail that typically is not occupied by women of color. Her journey and success story is one that will inspire and introduce a new field of opportunities.

Interested girls and parents are asked to reserve their space for this exciting event at <https://www.angelsntech.com/events.html>. **Tickets are free and this is a virtual and interactive event. And to help shorten the digital divide - Angels N Tech will also give one lucky participant the opportunity to win a laptop.**

Angels N Tech is a STEAM organization designed to help mentor minority girls between the ages of 11-18. Through teaching, mentoring, and fostering ignited interest toward STEAM, we empower girls to reach their fullest potential and realize they can be anything they choose.

About The Angels and Me Foundation, AngelsNTech

Angels & Me Foundation Angels N Technology (AngelsNTech), is a mentoring organization established to groom young girls and provide parents with resources to support their daughters' aspirations in all fields of Science, Technology, Engineering, Arts, and Mathematics (STEAM). As these fields continue to have a lack of inclusivity, our goal is to engage minority girls from underrepresented communities, ages 11-18 to explore the fields of STEAM as career choices. Through teaching, hands on projects, career shadowing, mentoring, and fostering positive attitudes toward STEAM, we empower girls to reach their fullest potential and realize they can be anything they choose. Our motto is to Ignite a passion for STEAM, Innovate techniques of tomorrow while problem solving today's challenges, and Inspire the next generation for change. AngelsNTech remains engaged throughout the lifecycle of our programs with each girl and caregiver/parent to ensure that the natural skills, and curiosities regarding STEAM careers including using skills gained for entrepreneurship endeavors, are upheld until the participants reach 18. At that point the objective of guiding the participants into a career field within STEAM, whether through college, technical trade, certification or job readiness, will have been met.
